Medel **Fertyl** is an ovulation thermometer for pregnancy or cycle tracking – compatible with the “Ovy” app, a the natural method for cycle tracking. The modern temperature measurement technology of Medel basal thermometers work in conjunction with a cycle tracking app to offer entirely new possibilities for predicting fertile and non-fertile days more reliably. Class IIa Medical Device.

Monitoring by Ovy app

Using the symptothermal method properly. The symptothermal method is a scientifically recognised form of natural family planning (NFP). Fertile days are determined using physical symptoms including basal temperature. All the important information are recorded using “Ovy” app. This makes it even easier to understand body’s signals and be more aware about monthly cycle in the long term.
